

# How to Add a Privacy Policy Page on GoDaddy

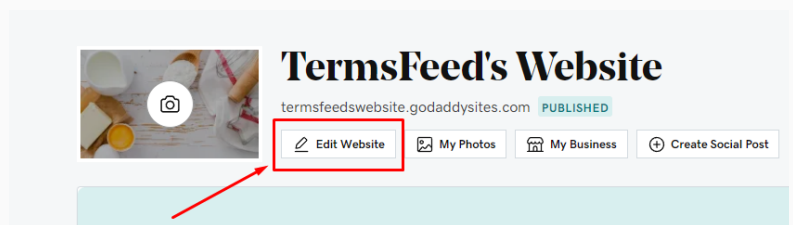

### Steps:

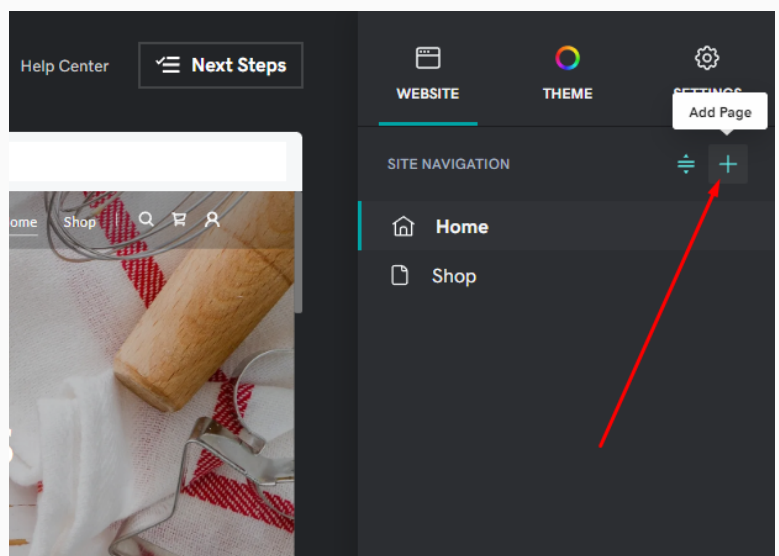

1. **Log in** to GoDaddy.

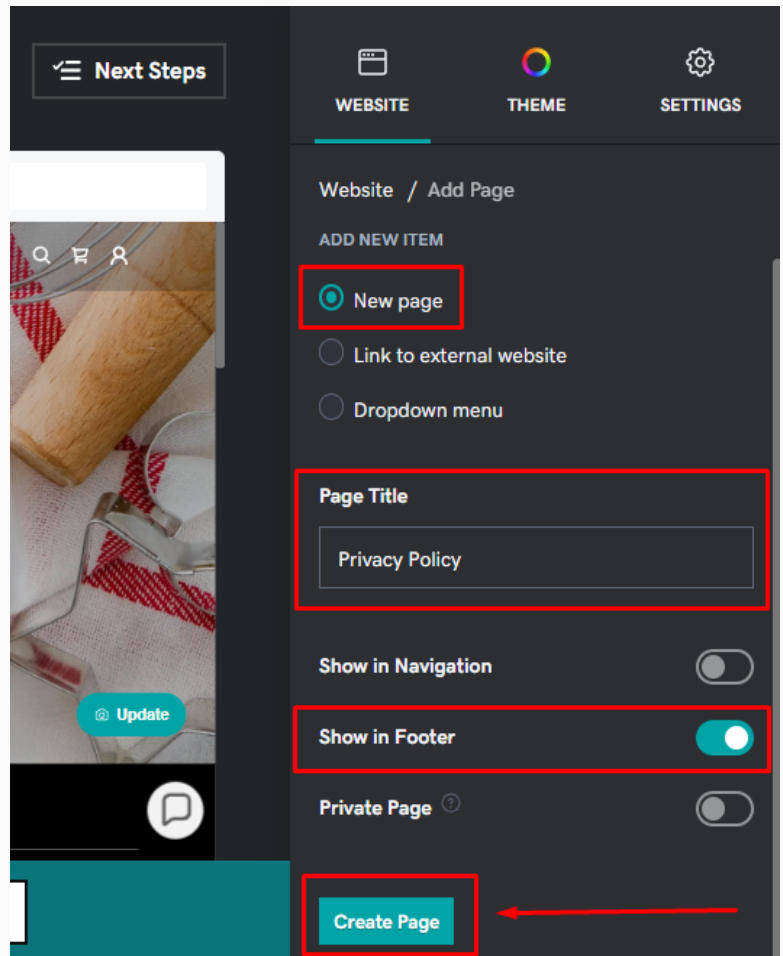

2. From the Dashboard, click on **Edit Website**:

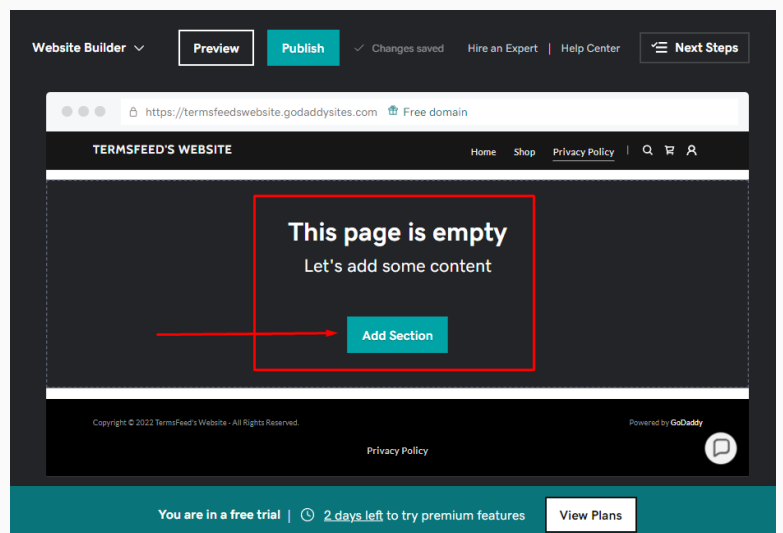

3. When the **Website Builder** opens, go to **Site Menu** and click on **+** to add a new page:

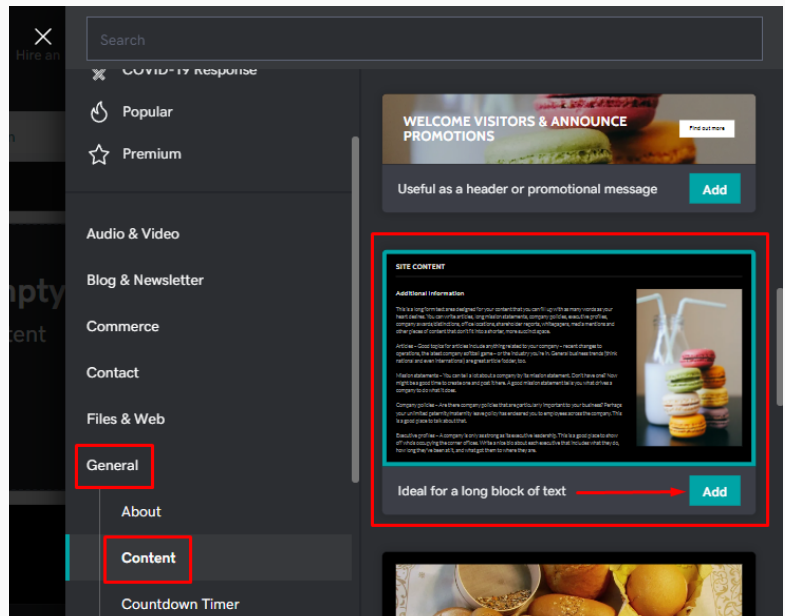

4. In the builder on the right side, type **"Privacy Policy"** in the **Page Title** field. Then, click the toggle for **Show in Footer** and click the **Create Page** button at the bottom:

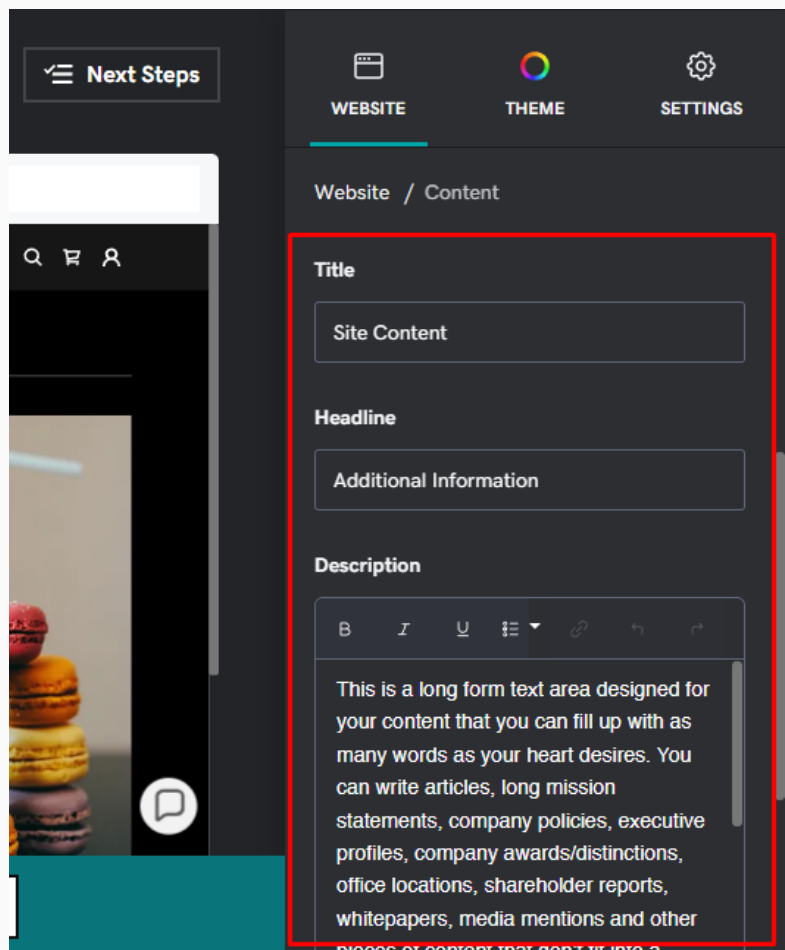

5. On the newly created Privacy Policy page, click the **Add Section** button:

6. In the **Add Section** menu, scroll to **General > Content**. On the right side, choose **Ideal for long blocks of text** and click the **Add** button:

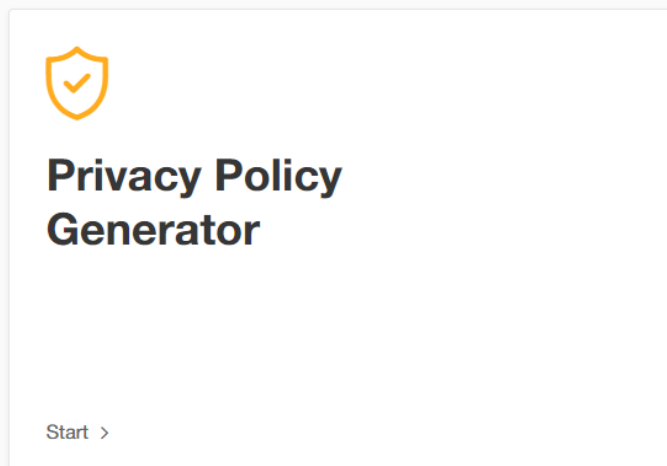

7. After the section is added, scroll to the **Title**, **Headline** and **Description** fields on the right side:

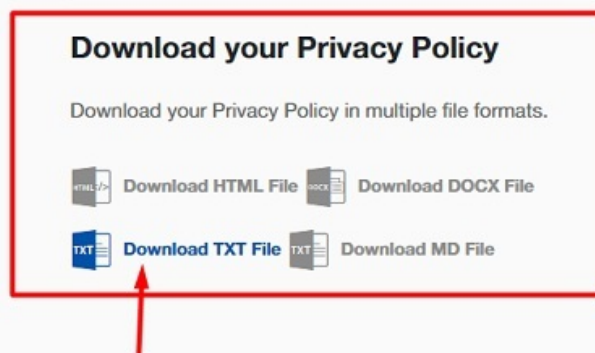

- Now you need to **add text to your Privacy Policy page**.

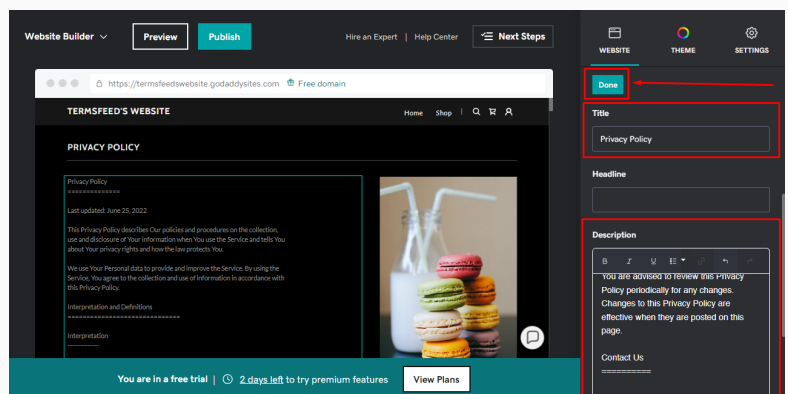

If you do not have a Privacy Policy, you can use our [Privacy Policy Generator](#) and create one within minutes.

- Once you have the Privacy Policy created by TermsFeed, let's get the policy text. You can copy the HTML variant of the policy or **download the Plain Text file** format:

- Go back to GoDaddy's Website Builder and title the page as **"Privacy Policy."** Remove the placeholder text under the **Headline** field. In the **Description** field, delete the placeholder text first and then **paste the text of your Privacy Policy**:

**You're done!**

# Legal compliance is now a breeze.

All-in-one compliance software that helps businesses get (and stay!) compliant with the law (GDPR, CCPA+CPRA, CalOPPA, and many more).
